

Laying A Foundation for Optimization

What is your organization's present level of performance when compared with "best in class" levels? Where is the "low hanging fruit" that could be quickly addressed to best improve your financial and operational performance? What holes in your value stream are keeping your organization from realizing its full potential? Do you want to find out?

An **OPERATIONS ANALYSIS** will provide you with a clear understanding of your organization's current system and process capability. It will answer these questions:

- How do you shape up against the best?
- Where are the biggest gaps between the "best in class" and your current mode of operation?
- How much are they costing you in terms of lost sales, higher costs, longer cycle time and customer dissatisfaction?
- Is your improvement map objectively charted out and aligned with a clear tactical execution plan?

For many, sometimes whipped by incessant customer demands, delivering what is acceptable has become the measure of satisfactory performance. Yogi Berra once said, "You can see a lot just by looking". Simply seeing opportunities for achievable improvement can trigger the action to achieve excellence. Our objective examination of your operations will provide cost cutting, value adding, and capability improving insights.

How far is your organization from its optimized level of performance? Let's take a look! Your **OPERATIONS ANALYSIS** findings will be fully documented and chart a path for capability improvement. Guaranteed: The ROI will far exceed any change implementation costs to be incurred.

Step #1: Simply call to schedule an **ANALYSIS** planning strategy session.

Dennis Bradley is the founder of Optimum Enterprises, an alliance of accomplished consultants who are expert in disciplines elemental in process optimization.
